

Dear Schneider Electric Hiring Team,

My name is Dušan Stefanović, and I am applying for the Graduate Internship Program 2025. I am a graduate in Electrical Engineering and currently completing my master's studies, and I see this program as an opportunity to begin my professional career in an environment that values learning, responsibility, and long-term development.

Throughout my academic and extracurricular experience, I have been most engaged in roles that required coordination, accountability, and calm decision-making under constraints. Across sports, event organization, and university team projects, I was often relied upon to bring structure, align people, and ensure steady progress toward shared goals. These experiences shaped my interest in environments where responsibility is earned through action and collaboration rather than hierarchy.

With an engineering background, problem-solving is a natural part of how I approach work. Beyond technical challenges, I am particularly motivated by solving problems through communication and coordination—clarifying direction, supporting teamwork, and enabling others to contribute effectively. I value environments that encourage initiative, curiosity, and learning through real responsibility, which strongly reflects Schneider Electric's IMPACT values.

I am open to international and cross-cultural experiences and see hybrid and global ways of working as valuable opportunities for growth early in my career. At the same time, I am motivated by building a long-term professional path within Schneider Electric and would welcome the opportunity to explore how my skills, adaptability, and mindset could contribute to the organization over time, across teams or regions where there is mutual fit.

Thank you for your time and consideration. I would welcome the opportunity to further discuss my background, interests, and potential alignment with Schneider Electric.

Dušan Stefanović
